

MUHAMMAD MOIZ

Full-Stack Developer | Backend Engineer | AI Integration

Karachi, Pakistan | moizm12348@gmail.com | linkedin.com/in/muhammad-moiz-0a0995301 | github.com/moizmalik13588

PROFESSIONAL SUMMARY

Computer Science graduate (2026) from SMIU Karachi with extensive hands-on experience building production-grade full-stack web applications. Proficient in Node.js, Next.js, React, Python, PostgreSQL, Redis, and Docker. Passionate about scalable backend architecture, AI integration, and clean API design. Scored 92.2 percentile (top ~8%) in the HEC National Computing Skills Test (NCST). Seeking a Full-Stack Developer or Backend Developer role.

TECHNICAL SKILLS

Frontend: React, Next.js 15, Vite, Tailwind CSS, TypeScript, JavaScript ES6+

Backend: Node.js, Express, NestJS, FastAPI, REST APIs, WebSockets (Socket.io)

Languages: JavaScript, TypeScript, Python

Databases: PostgreSQL, Redis, MongoDB, Prisma ORM, Drizzle ORM, SQLAlchemy, Mongoose

DevOps: Docker, Git/GitHub, Railway, Vercel, AWS (EC2, RDS, S3), Nginx, PM2, Linux/Bash

AI / APIs: Groq SDK, Vercel AI SDK, Anthropic API, VAPI (Voice AI)

Payments & Integrations: Stripe, Resend, Cloudinary, Twilio, Google Calendar API

CS Core: DSA, OS, Computer Networks, DBMS, Information Security, Software Engineering

PROJECTS

Clinicore — Multi-Tenant Clinic Management SaaS (Final Year Project)

React 19, Vite, React Router v7, Tailwind CSS, Node.js, Express, Prisma ORM, PostgreSQL, JWT, Zod, Node-Cron, Vapi AI Voice SDK, Twilio, Resend, Google Calendar API, Railway, Vercel

[Live Demo](#) | [API](#) | [GitHub Repository](#)

- Architected a multi-tenant clinic management SaaS with isolated tenant data boundaries in PostgreSQL, role-based access control across Owner/Staff/Doctor roles, and JWT dual-token authentication with email OTP verification.
- Built a 24/7 AI voice receptionist (Vapi.ai) that verifies real-time doctor availability, books/cancels appointments, and creates patient records during live phone calls via webhook-driven tool callbacks.
- Developed a real-time mood and sentiment analytics engine scoring call transcripts across 5 emotional categories with intensity tracking and trend visualization (Recharts), plus automated daily reports via Node-Cron.
- Implemented appointment scheduling with configurable doctor availability slots, two-way Google Calendar sync, automated Twilio SMS notifications, and revenue tracking across consultations and recovered no-shows.

ShopHub — Multi-Vendor E-Commerce Platform

Next.js 16, TypeScript, PostgreSQL (Neon), Prisma, NextAuth v5, Stripe, Cloudinary, Resend, Google OAuth, Vercel

[Live: shophub-store-pk.vercel.app](#) | [GitHub Repository](#)

- Built a full-stack multi-vendor marketplace with separate portals for customers, vendors, and admins — each with role-specific dashboards, analytics, and product/order management.
- Integrated Stripe payment processing with webhook handling for secure card-based checkout and order confirmation.
- Implemented email/password + Google OAuth (NextAuth v5), secure password reset flows, and role-based route protection via Next.js middleware.
- Deployed on Vercel with Neon serverless PostgreSQL, Cloudinary image CDN, and Resend transactional emails.

PenCraft — Production-Grade Blog Platform

Next.js 15, Node.js, Express, TypeScript, PostgreSQL, Prisma, JWT, Cloudinary, Resend, AWS EC2, AWS RDS, Nginx, PM2

[Live: pencraft.site](#) | [GitHub Repository](#)

- Full-stack blog platform deployed on AWS EC2 (Express backend) and Vercel (Next.js frontend) with custom domain and SSL via Let's Encrypt + Nginx reverse proxy.
- JWT authentication with access + refresh token rotation, reuse detection (force-logout on token theft), and httpOnly cookies for XSS protection.
- Email OTP Two-Factor Authentication (2FA), suspicious login email alerts, and activity logs with IP and device tracking.

- Swagger UI API documentation and PM2 process management for production uptime.

DevHire — AI-Powered Job Board Platform

Node.js, Express, PostgreSQL, Prisma, Redis, BullMQ, WebSockets, Groq (Llama-3.3-70b), React 18 + Vite, Tailwind CSS, Docker, Nginx, PgBouncer
[Live: dev-hire-beta.vercel.app](#) | [GitHub Repository](#)

- Production-grade job board with AI features: resume reviewer, JD generator, and interview prep — powered by Groq LLM (Llama-3.3-70b) with Redis caching (30min/1hr TTL).
- Real-time application status notifications via WebSockets + Redis Pub/Sub; smart match-score algorithm ranking candidates by skill overlap percentage.
- JWT auth with refresh token rotation, bcrypt password hashing, and role-based access control (Developer / Recruiter).
- Optimized database connectivity with Nginx load balancer config (3 replicas) and PgBouncer connection pooling, reducing 1000 concurrent client requests down to 25 DB connections; deployed on Railway + Vercel.

PROFESSIONAL EXPERIENCE

Software Development Intern | SALUQ Enterprises, Karachi 2024 · 6 Months

- Trained in backend engineering fundamentals within the Software Advancement Department, covering TypeScript, backend architecture patterns, and API design principles through assigned technical tasks.
- Practiced server-side programming concepts and backend design patterns through hands-on exercises in TypeScript.
- Explored LLM-based systems and AI agent workflows through applied learning tasks and exercises.
- Certificate of Internship awarded by Director HR, Laeeq Mubarak.

EDUCATION

Sindh Madressatul Islam University (SMIU), Karachi Graduated: June 2026

Bachelor of Science in Computer Science | CGPA: 3.3 / 4.0

- Relevant coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Information Security, Software Engineering
- Scored 92.2 percentile (top ~8%) in HEC National Computing Skills Test (NCST) — Problem Solving, DSA, Databases, Networks, Software Engineering

CERTIFICATIONS & COURSES

MERN Stack Development — Expertizo, Karachi, 2024

Completed comprehensive MERN Stack training covering MongoDB, Express.js, React, and Node.js. Built full-stack projects applying REST API design, JWT authentication, and component-based UI development.

The Complete Python Bootcamp: Go from Zero to Hero — Udemy, 2026

13-hour comprehensive Python course covering core syntax, data structures, and practical exercises.
